

Green Mobility Scheme Incentive Guidelines

Exploring incentives, eligibility, application, and benefits to drive sustainable mobility

Introduction to the Green Mobility Scheme

Promoting Sustainable Transportation for All

Sustainable Transportation Adoption

Encourages eco-friendly transport solutions to lessen environmental impact.

Aligning with Environmental Policies

Supports global commitments to decrease greenhouse gas emissions.

Diverse Participants Welcome

Open to individuals, companies, NGOs, and public entities for broad engagement.

Incentives for Private and Commercial Use

Promotes adoption of green vehicles and necessary infrastructure for all.

Incentive Structure

Enhancing Sustainable Transport with Green Mobility Incentives

Financial Support for Vehicle Rentals

The Corporation offers tax credits for leasing clean or zero-emission vehicles for 12 to 36 months, covering the extra costs compared to conventional vehicles, excluding operating costs.

Grants for Charging Infrastructure

Financial support provided for installing EV charging points in business premises and public areas, enhancing accessibility and convenience.

Eligibility Criteria

Requirements for Participating in the Green Mobility Scheme Incentives

01

Residents or Registered Businesses

Participants must be residents of Malta or registered businesses operating within the country to qualify for the incentives.

02

Employment Treshold

Applicant must maintain a workforce of at least 5 full-time employees.

03

Regulatory Compliance

Full compliance with VAT, Income Tax, and Social Security regulations is required.

I GREEN MOBILITY INCENTIVES

Support for Charging Infrastructure

Incentives for Eco-Friendly Charging Infrastructure

Scope of Support

Covers procurement, installation, and commissioning of private recharging infrastructure with smart functionalities for commercial vehicles.

Types of Financial Assistance

- o **Grants:** Up to 100% coverage of interest paid during the first 3 years of leasing on a loan.
- o **Tax Credits:** Calculated as a percentage of the eligible costs incurred.

Conditions

The infrastructure must be operated exclusively by the beneficiary and not accessible to third parties or the public.

Support for Leasing of Commercial Vehicles

Incentives for Eco-Friendly Vehicle Leasing

Eligibility

- Tax credits are provided for leasing commercial vehicles powered by electricity or hydrogen

Leasing Conditions

- Leasing Conditions
- **Minimum** leasing period: 12 months.
- **Maximum** leasing period: 36 months.
- Applies to clean vehicles and zero-emission vehicles.

Additional Considerations

- Special conditions for companies facing financial challenges or insolvency.
- Includes checks on debt, insolvency proceedings, and previous aid repayment status.

Application Process

Facilitating Participation in Sustainable Transportation Initiatives

Eligibility Assessment

We will verify that all criteria for the scheme are met, ensuring full compliance with the eligibility requirements.

Document Preparation & Submission

We will collect the required documents and submit the finalised application form, along with the necessary supporting materials, to the appropriate authority overseeing the

Application Review and Decision

After the application is reviewed, we will be notified of the decision regarding our acceptance into the scheme. If approved, we will thoroughly examine the terms and conditions associated with participation.

Planning for Implementation

Once accepted, we will initiate the planning process to integrate the scheme's benefits or requirements into the business operations. This may include strategic planning, resource allocation, and adherence to the

Compliance and Reporting

Ensuring Accountability in Green Mobility Initiatives

Penalties for Non-compliance

Failure to comply may lead to penalties, including the repayment of grants, ensuring accountability.

Government Audits

Audits verify that funds are used effectively and that environmental targets are met.

Record Keeping

Recipients must document fund usage and environmental benefits achieved to ensure transparency.

Periodic Reporting

Ongoing reports on vehicle and infrastructure usage help track compliance and progress.

Benefits of Participation

Promoting Sustainable Transportation for a Greener Future

1

Environmental Impact

- **Reduction in Carbon Emissions:** Transitioning to electric vehicles and bicycles helps decrease reliance on fossil fuels, reducing overall carbon emissions.
- **Enhanced Air Quality:** Fewer traditional vehicles on the road contribute to better air quality, particularly in urban areas.

2

Economic Benefits

- **Cost Savings:** Reduced fuel and maintenance costs associated with electric vehicles and bicycles.
- **Business Opportunities:** Potential for growth in sectors related to green mobility, such as EV charging infrastructure and sustainable transportation services.

3

Social Benefits

- ****Health Improvements:** Encouraging active transportation, like cycling, can lead to health benefits for individuals.
- ****Community Engagement:** Promotes a culture of sustainability and environmental responsibility within communities.
